Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 6-10, 13 and 14 are pending after the amendment of 12/02/04. Claims 6-8 stand withdrawn from consideration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9,10,13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Solomon et al (US 5,205,932) in view of Shibuya et al (US 6,153,228).

Claims 9 and 13: Solomon teaches an antibacterial filter (figure 2) for filtering water comprising a water introduction unit (16), cylindrical with donut cross-section (see figures), a water purifying unit (layers A-E) and a water discharging unit (14), a center pipe (26) in communication with openings at a lower portion of the cartridge (25a), plural filter media (A-E), which are antibacterial media (col 2 lines 55-68).

Solomon does not specify what the antibacterial component is. Shibuya teaches propolis components as antibacterial material that can be loaded on to any surface or carrier material (col 8 lines 17 – 65). It would be obvious to one of ordinary skill in the art at the time of invention to use the teaching of Shibuya in the teaching of Solomon because Solomon does not specify what it's antibacterial material is.

Claims 10 and 14: One of the base member is a ceramic or an ore (manganese dioxide – col 5 lines 10-23).

Response to Arguments

Applicant's arguments with respect to the instant claims have been considered but are moot in view of the new ground(s) of rejection.
